## EXPERIMENT – 2

Create a Career Oriented Presentation with 7 slides using transitions and animations.

### Building Your Career Path: A Strategic Guide

Embark on a journey to shape your professional future with intention and clarity. This presentation will equip you with the tools and insights to navigate your career path effectively, leading to greater fulfillment and success.

### Why Career Planning Matters

#### Boosted Motivation & Success

According to a 2025 LinkedIn study, 70% of professionals report that deliberate career planning significantly increases their motivation and overall success.

#### Clear Goals, Greater Satisfaction

Defining clear professional objectives directly correlates with higher job satisfaction and abundant growth opportunities within your chosen field.

#### Strategic Direction

A well-thought-out career plan provides a strategic compass, guiding your decisions and ensuring every step contributes to your long-term vision.

## Assessing Your Strengths & Interests

Self-Discovery Tools

Aligning Passions with Goals

## Setting SMART Career Goals

- 1 **Specific**  
Clearly define what you want to achieve.
- 2 **Measurable**  
Establish criteria for tracking progress.
- 3 **Achievable**  
Ensure goals are realistic and attainable.
- 4 **Relevant**  
Align goals with your broader career aspirations.
- 5 **Time-bound**  
Set a clear deadline for completion.

**Example:** "Become a project manager within 3 years by completing PMP certification, leading two successful projects, and demonstrating leadership skills."

## Building Skills & Experience

### Certifications & Learning

Invest in specialized certifications, attend workshops, and consider internships or volunteer roles that directly enhance your skill set and provide practical experience.

### Strategic Networking

Actively engage in industry events, leverage platforms like LinkedIn for outreach, and cultivate meaningful professional relationships that can open doors to new opportunities.

### Showcasing Achievements

Develop a compelling professional portfolio or a meticulously crafted resume that highlights your accomplishments, showcasing the tangible impact of your work and skills.

## Overcoming Challenges & Staying Adaptable

### Continuous Learning

The job market constantly evolves. Embrace a mindset of continuous learning to stay relevant and ahead of emerging trends.

### Resilience & Mentorship

Navigate setbacks with unwavering resilience. Seek out mentors who can provide guidance, support, and a fresh perspective during challenging times.

### Case Study: Sarah Lee

Sarah successfully pivoted from marketing to data analytics in just 18 months, demonstrating the power of adaptability and strategic skill acquisition.

## Your Career Roadmap: Next Steps

01

### Develop a 1-Year Action Plan

Outline specific milestones and regularly review your progress to stay on track and make necessary adjustments.

02

### Leverage Mentors & Feedback

Actively seek constructive feedback and guidance from experienced mentors to accelerate your personal and professional growth.

03

### Embrace Opportunities

Remain open to new opportunities and allow your interests to evolve, recognizing that career paths are often dynamic and non-linear.

## Your Future Starts Now

Take the first step towards a fulfilling and impactful career.

## Thank You!

- **Questions & Discussion:** Feel free to ask anything about career planning or strategy.
- **Contact Info:** [Your Name/Company Name] | [Your Email] | [Your Website/LinkedIn]

📌 We're here to support your career journey. Reach out for follow-up and access to exclusive career resources.

## **EXPERIMENT – 3**

Create a social media poster for “DIGITAL AWARENESS WEEK” using canva.

## EXPERIMENT – 4

Compose & send a professional email with an attachment as “you are applying for an internship, send email to HR with your resume attached”.

Hiring Manager  
Microsoft  
Bengaluru, Karnatka

Subject: Application for hiring Python Devloper

Respected Madam

I am writing to express my interest in the Python Devloper role in your organisation. I have recently completed my MCA (Master of Computer Applications) and I am looking for an opportunity to begin my career in the IT industry.

During my MCA, I gained strong foundations in Java, Python, DBMS, SQL, HTML, CSS and Data Structures. I have also worked on academic projects where I learnt how to design backend logic, implement database connectivity and develop user interfaces. I am familiar with Git/GitHub, basic SDLC concepts and teamwork in group projects. I learn fast and can adapt to professional environments quickly.

I am confident that I can contribute positively as a beginner with a sincere learning attitude. It would be an honour if you consider my profile for an interview. I am ready to join immediately and would love to grow along with the organisation.

Thank you for your time and consideration.

Regards,  
Girdhar Chouhan

# EXPERIMENT – 7

## Using Google Drive or OneDrive.

## **EXPERIMENT – 8**

**Identify one real phishing email : A final-year student, Aman, receives a LinkedIn message saying.**

“You are shortlisted for a Remote Software Developer role at Google. Salary: ₹18 LPA. Pay ₹2,499 as verification fee. Limited seats. Pay now to confirm.”

**ANSWER THE QUESTIONS :-**

**Q.1 What type of cybercrime is happening here?**

**Ans:-** This is a Phishing scam (specifically a Job Offer / Employment Scam).

The attacker is trying to trick the victim into paying money and possibly sharing personal details by pretending to be a legitimate company (Google).

**Q.2 List 3 red flags that show it is a scam?**

**Ans :-**

**1. Verification fee demand**

Legitimate companies like Google never ask for money (₹2,499) for job verification or selection.

**2. Unrealistic offer without process**

A salary of ₹18 LPA, remote role, and “shortlisted” message without interviews, coding tests, or official communication is highly suspicious.

**3. Urgency and pressure tactics**

Phrases like “Limited seats” and “Pay now to confirm” are classic scam tactics to force quick decisions without verification.

**Q.3 What should he do to verify if a job offer is real?**

## **Ans:- 1. Check the sender's profile carefully**

- Verify if the LinkedIn account is officially connected to Google
- Look for a verified company badge and genuine work history

## **2. Confirm through official channels**

- Visit Google's official careers website
- Check whether the same job role is listed there

## **3. Never pay any fees**

- Legitimate employers do not charge money for hiring, background checks, or verification

## **4. Contact the company directly**

- Use official company emails or career portals, not links shared in messages

## **5. Report and block the sender**

- Report the message to LinkedIn as a scam
- Block the sender to prevent further contact

# Create a Google Form Quiz with the following requirements.

## General Knowledge Quiz

Answer all questions. Each question carries 2 point.

...

1. Which of the following is a valid Python variable name? \*

- ☐ 2value
- ☐ value-2
- ☐ \_value
- ☐ value 2

2. Which keyword is used to define a function in Python? \*

- ☐ function
- ☐ def
- ☐ fun

# EXPERIMENT – 10

- Ask ChatGPT OR Google Gemini to generate a 100–120-word paragraph on: “Is online learning better than offline learning for college students?”
  - (a) Run the AI-generated text through Grammarly and any plagiarism-check tool.
  - (b) Now manually search online to check if similar sentences exist on blogs or articles.
  - (c) Identify 2–3 biased statements in the AI answer, such as:
    - i. Overgeneralizations
    - ii. One-sided opinions
    - iii. Unproven claims
  - (d) Rewrite the entire paragraph in a neutral and balanced way, using AI only for grammar suggestions.
  - (e) Submit 3 screenshots:
    - i. Plagiarism check results
    - ii. Grammarly suggestion page
    - iii. Original AI paragraph vs your rewritten unbiased version

ChatGPT Generated: -

Online learning offers college students flexibility and access to a wide range of resources, enabling them to study asynchronously and balance jobs or family responsibilities. High-quality online courses can deliver structured content, multimedia, and collaboration tools that support diverse learning styles. However, remote formats can reduce spontaneous in-person interactions and make it harder to practise interpersonal skills, lab work, or hands-on projects that benefit from physical presence. Outcomes often depend on course design, student motivation, and access to reliable technology. For many students, blended models that combine online content with face-to-face sessions provide the best balance — pairing the scalability and convenience of digital learning with the social, practical, and mentoring benefits of traditional classrooms.

The screenshot displays the QuillBot AI Detector interface. On the left, a sidebar lists various tools: Paraphraser, Grammar Checker, AI Detector (selected), Plagiarism Checker, AI Humanizer, AI Chat, AI Image Generator, Translate, Summarizer, and More. The main area shows the text: "Online learning offers college students flexibility and access to a wide range of resources, enabling them to study asynchronously and balance jobs or family responsibilities. High-quality online courses can deliver structured content, multimedia, and collaboration tools that support diverse learning styles. However, remote formats can reduce spontaneous in-person interactions and make it harder to practise interpersonal skills, lab work, or hands-on projects that benefit from physical presence. Outcomes often depend on course design, student motivation, and access to reliable technology. For many students, blended models that combine online content with face-to-face sessions provide the best balance — pairing the scalability and convenience of digital learning with the social, practical, and mentoring benefits of traditional classrooms." The text is highlighted in orange. On the right, the AI Detector results show a 22% AI score, a bar chart comparing AI (orange) and Human (white) scores, and a list of AI-generated contributors. The bottom of the interface includes a "Refine with Paraphraser" button and a "Want your text to sound more authentic?" prompt.

## Rewrite: -

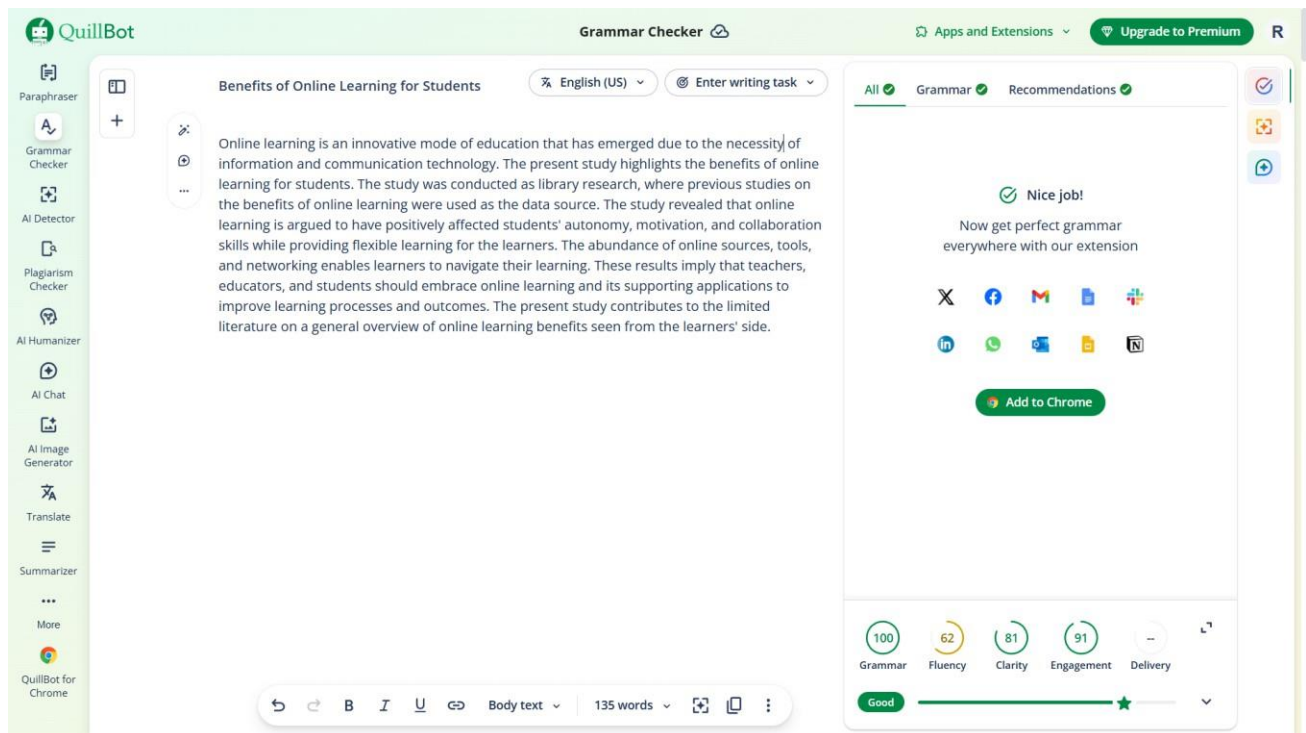

Online learning is an innovation in learning mode brought by the inevitability of information and communication technology. The present study highlights the benefits of online learning for students. The study was conducted as library research, where previous studies on the benefits of online learning were used as the data source. The study revealed that online learning is argued to have positively affected students' autonomy, motivation, and collaboration skills while providing flexible learning for the learners. The abundance of online sources, tools, and networking enables learners to navigate their learning. These results imply that teachers, educators, and students should embrace online learning and its supporting applications to improve learning processes and outcomes. The present study contributes to the limited literature on a general overview of online learning benefits seen from the learners' side.

The image shows the QuillBot AI Detector interface. On the left is a sidebar with various tools: Paraphraser, Grammar Checker, AI Detector (selected), Plagiarism Checker, AI Humanizer, AI Chat, AI Image Generator, Translate, Summarizer, and More. The main area displays a text sample about online learning. Below the text, it shows '132 Words' and a green checkmark indicating 'Analysis complete'. On the right, a large '0%' indicates that '0% of text is likely AI'. Below this, a bar chart shows 'AI-generated' at 0%, 'Human-written & AI-refined' at 0%, and 'Human-written' at 100%. A section titled 'Understanding your results' explains that the AI detector flags text that may be AI-generated and advises users to use their best judgment. At the bottom, there is a green button labeled 'Refine with Paraphraser'.

The image shows the Plagiarism Checker interface. At the top, there are tabs for 'Plagiarism Checker' (selected), 'Check Grammar', and 'AI Detector'. A 'Pro' badge is visible in the top right. The 'Scan Properties' section on the left shows: Sources Found: 0, Words: 115, and Characters: 849. A 'View More Details' button is below. The main results area shows 'Plagiarism 0%' with a large green circle, '0% Exact Match', and '0% Partial Match'. A 'Unique 100%' result is shown with a green circle. Below the results, there is a text block about online learning and an illustration of a student at a desk with a laptop and a checklist. The text says 'Congratulations! No Plagiarism Found'.

# EXPERIMENT – 11

- To compare AI-generated content with student-created content and understand limitations of AI.
  - (a) Write a 100–150-word paragraph on the topic: “Will AI replace jobs or change them?”  
(This must be written by the student.)
  - (b) Ask any AI tool (ChatGPT/Gemini/Copilot) to write the same topic.
  - (c) In your practical copy, create a Comparison Table with the headings:
    - i. Human-Generated Content
    - ii. AI-Generated Content

**Hand Writen -:**

**“Will AI replace jobs or change them?”**

As we live in the era of AI, the most asked question is whether AI will replace our jobs. My answer to this question is that as we progress through new technology and the era of innovation, an AI will more likely change the job rather than replace it. While AI can do lots of work in a very small amount of time without getting tired, some jobs require human creativity, emotional intelligence, critical thinking, and moral judgment—skills that AI doesn't have. For example, AI can quickly analyze medical data that is necessary for human doctors to make accurate diagnoses, provide patient care, and inform

decision-making. AI is a tool that can help us do our tasks in a much more efficient and productive way. AI will reduce some low-skill jobs, creating challenges for workers. However, it will create new jobs such as AI development, data analysis, cybersecurity, and AI ethics. Overall, AI will not replace our jobs; it represents the shift in the nature of work, making adaptability and continuous learning much more important than ever.

### AI Generated: -

Artificial Intelligence is more likely to change jobs than completely replace them. While AI can automate repetitive and routine tasks, many roles still require human creativity, emotional intelligence, critical thinking, and ethical judgment—skills that machines cannot fully replicate. For example, AI can assist doctors by analyzing medical data, but human doctors are still essential for diagnosis, decision-making, and patient care. Similarly, AI tools help teachers, designers, and programmers work more efficiently rather than eliminating their roles. At the same time, AI will reduce demand for certain low-skill or repetitive jobs, creating challenges for workers who lack opportunities to reskill. However, it will also generate new careers in areas such as AI development, data analysis, cybersecurity, and AI ethics. Overall, AI represents a shift in the nature of work, making adaptability and continuous learning more important than ever.

## Comparison: Machine-Generated vs. Manual Writing

Criteria	AI-Created Content	Hand-Written (Human) Content
Main Argument	Contends that AI will transform careers rather than eliminating them	Shares a similar perspective but through a personal lens
Tone of Writing	Professional and scholarly	Casual and chatty
Tone & Voice	Detached and objective	Contains individual viewpoints
Phrasing	Brief and symmetric	Somewhat extended with slight redundancy
Grammar Precision	Extremely precise	Generally correct
Illustrations	Broad and educational	Story-based and typical of a learner
Feeling	Lacks deep emotion	Has a distinct personal connection
Impartiality	Unbiased and even-handed	Tends to rely on personal beliefs
Authenticity	Standard or robotic	Genuine and organic
Test Usage	Useful for study material	Perfect for written tests

# EXPERIMENT – 12

Create a new Notebook LM project titled: “My Chapter Revision Notes.”

(a) Upload multiple sources (any 2) such as:

- i. PDF notes
- ii. Web articles
- iii. Text copied into Notebook LM

(b) Ask Notebook LM to:

- i. Create a combined study guide using all sources.
- ii. Generate flashcards for quick revision.
- iii. Create a concept map or explanation of the

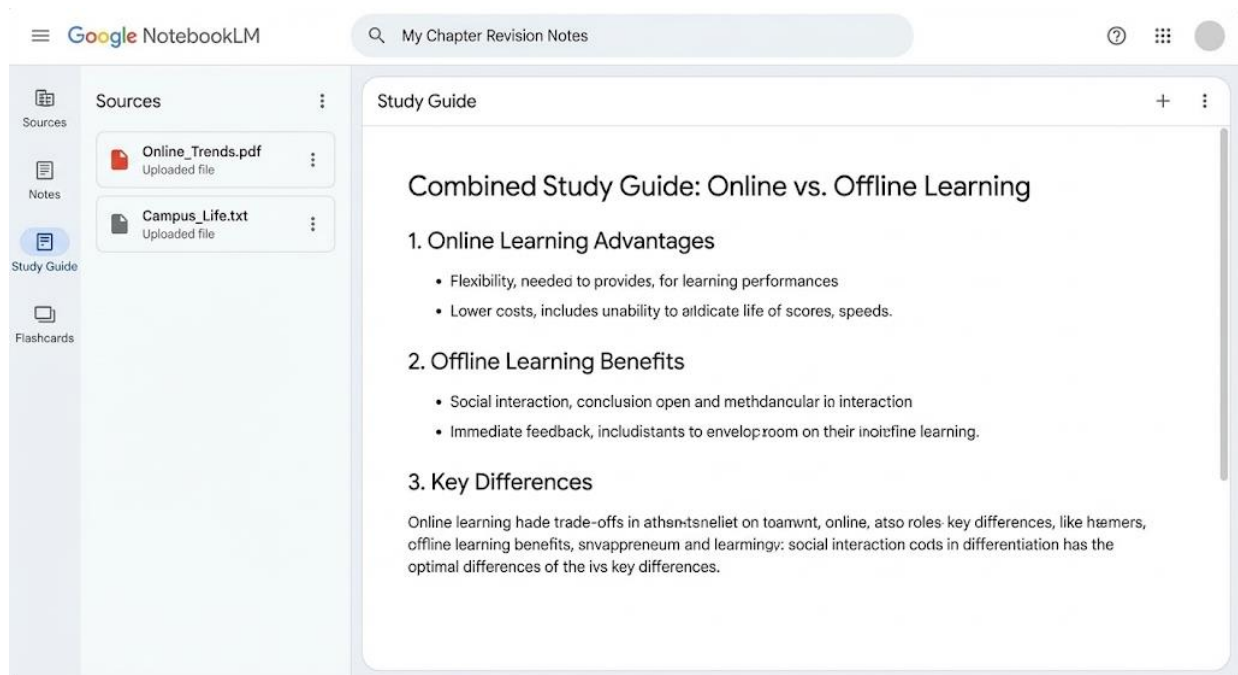

topic. Manually check for:

- i. Any incorrect facts
- ii. Repeated information
- iii. Missing important points

Attach 3 screenshots from Notebook LM:

- I. Combined study guide
- ii. Flashcards
- iii. Concept map / explanation

I. Combined study guide :-

## ii. Flashcards

The screenshot shows the Google NotebookLM interface. On the left, a sidebar contains 'Sources' with two files: 'Online\_Trends.pdf' and 'Campus\_Life.txt'. Below this are icons for 'Notes', 'Study Guide', and 'Flashcards'. The main area is titled 'Study Guide' and contains a document titled 'Combined Study Guide: Online vs. Offline Learning'. The document lists three sections: '1. Online Learning Advantages', '2. Offline Learning Benefits', and '3. Key Differences'. A flashcard overlay is positioned in the center, displaying the question 'What is a primary benefit of online learning regarding schedule?' and a 'Reveal Answer' button. The flashcard is part of a stack, with other cards visible behind it.

## iii. Concept map / explanation

The screenshot shows the Google NotebookLM interface. On the left, a sidebar contains 'Sources' with two files: 'Online\_Trends.pdf' and 'Campus\_Life.txt'. Below this are icons for 'Notes', 'Study Guide', and 'Flashcards'. The main area is titled 'Concept Explanation' and contains a document titled 'Concept Map: Learning Models'. The document lists two main sections: 'I. Learning Models' and 'II. Learning Models'. Under 'I. Learning Models', there are two sub-sections: 'A. Online Learning' and 'B. Offline Learning'. Each sub-section lists three items: '1. Characteristics (Asynchronous, Remote)', '2. Pros (Flexibility)', and '3. Cons (Less Social)'.

## EXPERIMENT – 13

- Create a complete Student Result Management workbook.

(a) Create a new workbook with 3 sheets renamed as:

- i. Student Data
- ii. Marks Analysis
- iii. Charts

(b) In Student Data, enter a list of 15 students with:

(c) Name, Roll No, Class, City, Subject1, Subject2, Subject3.

(d) Use Flash Fill to split "Full Name" into "First Name" and "Last Name".

(e) Use Find & Replace to replace city name "Delhii" with correct "Delhi".

(f) Use IF function to calculate Pass/Fail (Pass = total  $\geq$  120).

(g) Use COUNTIF to find how many students belong to "Delhi".

(h) Use AVERAGE, MAX, MIN to analyse marks in the Marks Analysis sheet.

(i) On the Charts sheet, create:

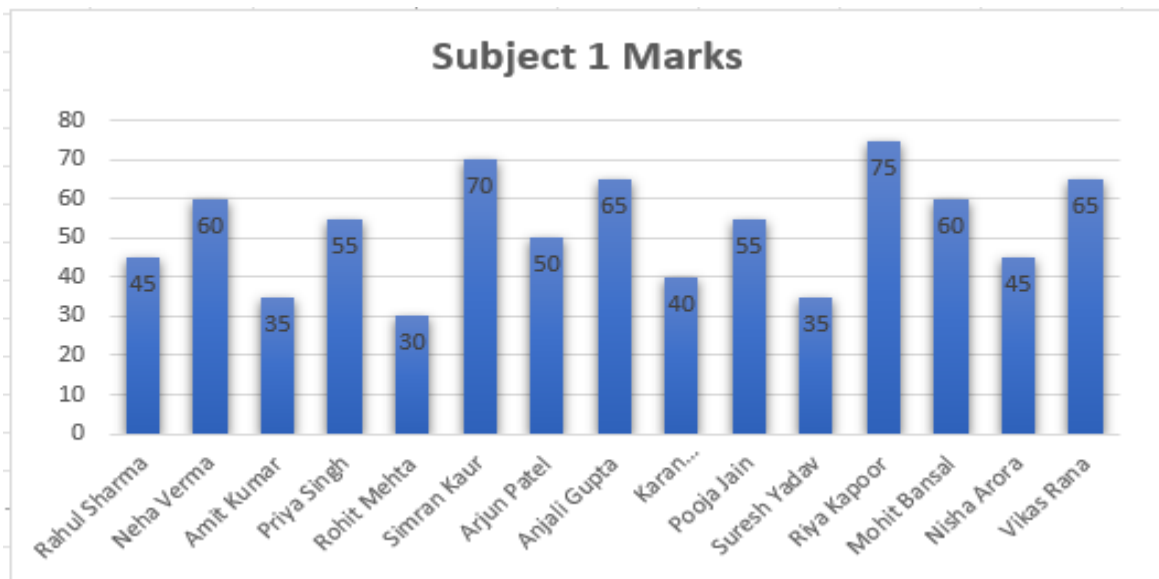

- i. A Bar Chart showing marks of any one subject.
- ii. A Pie Chart showing percentage of pass vs fail.

(j) Apply Conditional Formatting to highlight marks < 40 in red.

(k) Convert the table into a formatted Excel Table.

Full Name	Roll No	Class	City	Sub1	Sub2	Sub3	Total	Result
Rahul Sharma	1	10A	Delhii	45	50	55	150	Pass
Neha Verma	2	10A	Delhi	60	65	70	195	Pass
Amit Kumar	3	10A	Mumbai	35	40	45	120	Fail
Priya Singh	4	10A	Delhii	55	60	65	180	Pass
Rohit Mehta	5	10A	Delhi	30	35	40	105	Fail
Simran Kaur	6	10A	Chandigarh	70	75	80	225	Pass
Arjun Patel	7	10A	Ahmedabad	50	55	60	165	Pass
Anjali Gupta	8	10A	Delhi	65	60	70	195	Pass
Karan Malhotra	9	10A	Delhii	40	45	50	135	Pass
Pooja Jain	10	10A	Jaipur	55	50	45	150	Pass
Suresh Yadav	11	10A	Delhi	35	30	40	105	Fail
Riya Kapoor	12	10A	Mumbai	75	80	85	240	Pass

## **EXPERIMENT – 14**

- Build a workbook for managing and analyzing sales data of a small store.

(a) Create a workbook with sheets:

i. Store Sales

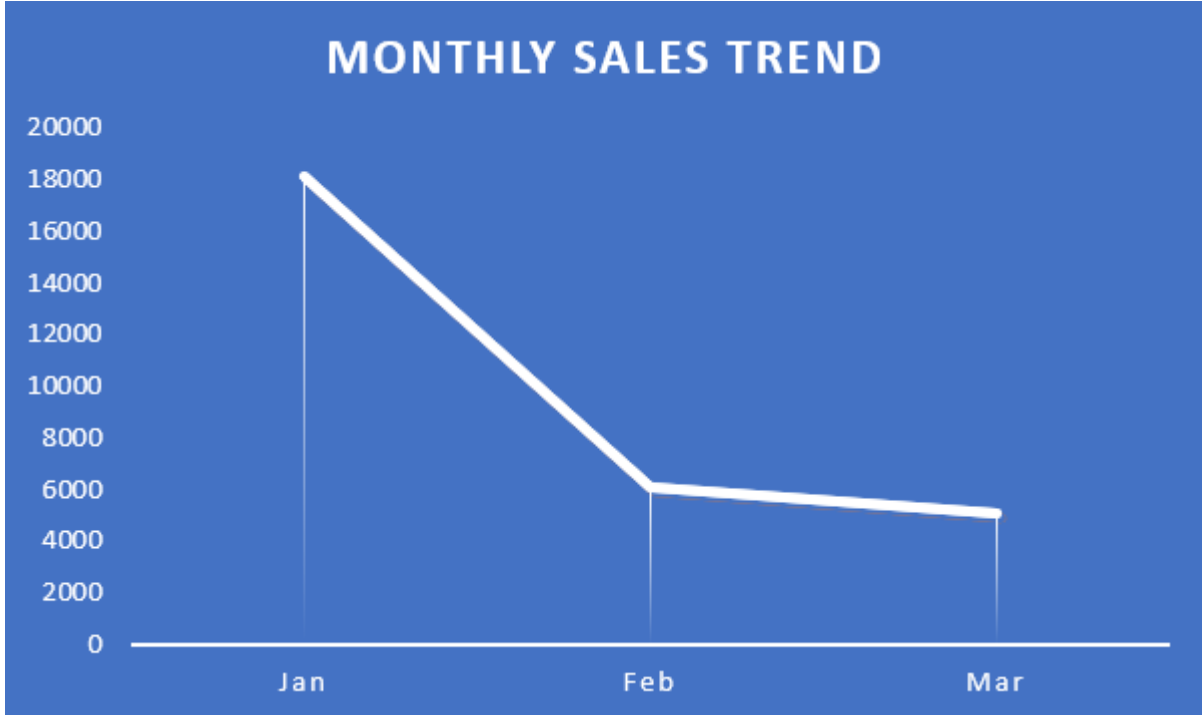

## ii. Summary

- (b) Import a CSV sales file (or create a sample table) containing: Date, Product, Category, Quantity, Price, Total Sales.
- (c) Use Sort (A→Z, Z→A) to organize products by name and category.
- (d) Apply Filter to view only “Electronics” category.
- (e) Use SUMIF to find total sales for a selected product (e.g., “Headphones”).
- (f) Use LEFT, RIGHT, MID to extract:
  - I. First 3 letters of the product name
  - II. Last 2 letters of the category
- (g) Find the highest and lowest sales value using MAX/MIN.
- (h) Prepare a monthly sales summary in the Summary sheet using AVERAGE & SUM.
- (i) Create a Line Chart of month-wise total sales in the Charts sheet.
- (j) Apply sheet protection so data cannot be edited accidentally.

Date	Product	Category	Qty	Price	Total Sales	Prod_first3 Digit	Cat_Last2
01-Jan-25	Headphones	Electronics	5	1500	7500	Hea	cs
05-Jan-25	Mouse	Electronics	10	500	5000	Mou	cs
10-Jan-25	Keyboard	Electronics	7	800	5600	Key	cs
15-Feb-25	Notebook	Stationery	20	50	1000	Not	ry
18-Feb-25	Pen	Stationery	30	20	600	Pen	ry
22-Feb-25	Headphones	Electronics	3	1500	4500	Hea	cs

12-Mar-25	File	Stationery	15	60	900	Fil	ry

Metric	SUM of Value
Highest Sale	7500
Lowest Sale	600
Total Sales (Headphones)	7500
Grand Total	15600

Month	Total Sales	Average Sales
Jan	18100	6033.333333
Feb	6100	2033.333333
Mar	5100	2550

## EXPERIMENT – 15

Create a complete personal financial planner workbook.

Date	Category	Expense Detail	Amount (₹)	Payment Method	Day	Month
02-01-2025	Food	Lunch	250	Cash	2	1
03-01-2025	Travel	Bus Pass	1200	UPI	3	1
05-01-2025	Fees	Exam Fee	3000	Card	5	1
06-01-2025	Shopping	Books	1800	UPI	6	1
07-01-2025	Food	Dinner	450	Cash	7	1
08-01-2025	Travel	Cab	2200	UPI	8	1
09-01-2025	Other	Recharge	399	UPI	9	1
10-01-2025	Shopping	Shoes	3500	Card	10	1
11-01-2025	Food	Snacks	150	Cash	11	1
12-01-2025	Fees	Course Fee	5000	UPI	12	1
13-01-2025	Travel	Train	1800	Card	13	1
14-01-2025	Other	Internet	999	UPI	14	1
15-01-2025	Food	Groceries	2200	Cash	15	1
16-01-2025	Shopping	Clothes	2700	Card	16	1
17-01-2025	Travel	Fuel	2000	Cash	17	1
18-01-2025	Fees	Library Fee	1200	UPI	18	1
19-01-2025	Food	Breakfast	120	Cash	19	1
20-01-2025	Other	Medicine	650	Cash	20	1
21-01-2025	Shopping	Bag	1900	UPI	21	1
22-01-2025	Travel	Auto	300	Cash	22	1

Category	Budget (₹)	Actual (₹)	Difference (₹)
Food	4000	3340	660
Travel	10000	9500	500
Fees	10000	9200	800
Shopping	12000	11900	100
Other	5000	3048	1952

Chart showing category-wise spending

Budget vs Actual

The expense data, consisting of 20 transactions, shows a total spending of 31,818 with an average transaction amount of 1,590.9. The analysis of this data reveals key patterns in how money is spent and which payment methods are most frequently used.

#### Key Takeaways from Expense Analysis

#### Spending is Highly Concentrated in a Few Categories

The top three categories, Shopping, Fees, and Travel, account for over 83% of the total recorded expenses, indicating where the majority of the budget is allocated.

- Shopping is the highest spending category, totaling 9,900.
- Fees is the second largest category at 9,200, which includes significant one-time

payments like the Exam Fee (3,000) and College Fee (6,000).

- Travel follows with 7,500, mainly driven by major costs such as the Flight Ticket (5,000).
- Food expenses are a smaller portion of the total, amounting to 3,170.

**1. UPI and Card Payments Dominate Transactions**

Digital payment methods like UPI and Card are the primary ways expenses are settled, representing over 80% of the total amount spent.

- UPI is the most preferred payment method, accounting for the largest total expenditure of 14,698.
- Card payments are the second most used, with a total of 11,000 spent.
- Cash is used for the lowest total amount, at 6,120, suggesting a preference for digital transactions, potentially for larger amounts.

The following charts illustrate the distribution of expenses:

**Total Expense by Category**

This bar chart shows the total amount spent in each expense category, clearly highlighting Shopping, Fees, and Travel as the largest contributors to overall spending.

**Total Expense by Payment Method**

This chart visualizes the total amount spent using each payment method, demonstrating the dominance of UPI and Card payments.
